

6. ESTIMATION / ಅಂದಾಜು ಅಳತೆ

- i. With the help of improvised apparatus, estimate two Distances/ Widths of not more than 100 meters but not less than 30 meters.
ಸುಧಾರಿತ ಉಪಕರಣ ಬಳಸಿ 100 ಮೀಟರ್‌ಗಳಿಗೆ ಮೀರದಂತೆ, ಆದರೆ 30 ಮೀಟರ್‌ಗಳಿಗೆ ಕಡಿಮೆಯಾಗದಂತೆ 2 ದೂರಗಳನ್ನು / ಅಗಲಗಳನ್ನು ಅಂದಾಜು ಮಾಡಿರಿ.

Estimation.

Learning to Judge Distance.

As a means of checking your estimate learn the exact length of your pace. I fairly tall, learn to pace an exact yard heel to heel. On a quiet road, in a field or out on the prairie, begin judging short distance to various objects. Then pacing to check your 'guess'. Gradually increase the distances. Do this in competition with several other scouts and you'll find it an interesting game. Remember that the eye measures distance as in an 'air line' from eye to object, and does not allow for irregularities of the ground. In other words, ground distance may be greater than visual distance.

As an aid in making short measurements you should know a number of your personal measurements. Your known hand-span will often be particularly useful. If fully developed your measurements will be close to this.

Arrange markers in a circle about 50 feet across. Standing at a marked spot in the center, scouts are asked to choose the marker that is closest to NW or SE or some specific degree bearing.

You can decide if a compass is allowed or if they need to tell direction by sun or stars.

b. Be able to march three deep with your Troop smartly & in good order. Follow drill commands during marching.

ನಿಮ್ಮ ದಳದೊಡನೆ ಮೂರರ ಸಾಲಿನಲ್ಲಿ ಚುರುಕಾಗಿ ಮತ್ತು ಕ್ರಮ ಬದ್ಧವಾಗಿ ಪಥ ಸಂಚಲನ ಮಾಡುವಾಗ ಪಥ ಸಂಚಲನೆಯ ಸಂದರ್ಭದಲ್ಲಿ ಕವಾಯತು ಆಜ್ಞೆಗಳನ್ನು ಅನುಸರಿಸಬೇಕು.

Back woodsman cooking has been dubbed as one of the toughest section after Pioneering. Nevertheless, there are many failures in this section, so a good foundation in the basics of backwoods cooking is necessary for scouts.

Cooking Methods.

For this method you will require a good bed of embers. For large animals and birds you will need a spit construction over the fire. For smaller animals and fish the best way, is to ped them out on a board or a flat piece of wood and stand this next to the fire to form a kind of reflector.

Grilling

For this method, you will need some kind of grill which can be made from green sticks and a hot bed of embers. The disadvantage of grilling food is that it tends to dry out.

Frying

You will need some form of pan or grill base, usually a flat stone which is place in the fire to heat it up. The stone is then cleaned off and food fried on it. It may be necessary to place small pieces of twine around such things as eggs to stop them rolling of the stone.

Fried egg

Crack gentle on side of pan and let egg slip into clean oil or fat. Fry until the white is firm. The yolks can be cooked by spooning some of the hot oil over the top or the egg can be flipped over.
